Art Unit: 1731

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims ~~2-52~~¹⁻⁶ are rejected under 35 U.S.C. 103(a) as being unpatentable over
WO/9602632 (equivalent to U.S. Patent 5,68,765) in view of GLASSER et al.

WO/9602632 teaches treating pulp with *Bacillus* sp. SD902 to produce a xylose or xylooligosaccharide. GLASSER et al teaches treating xylose or xylooligosaccharide with methyl chloride to produce ethers. See column 1, lines 26-34 and 41-55). It would have been obvious to one of ordinary skill in the art that the xylose or xylooligosaccharide produced by WO/9602632 could be treated with methyl chloride to produce ethers as taught by GLASSER et al.

It is noted that DE 4440 245 was not considered as a translation was not provided.
